WB Foundation Continuing Education Courses:

Four Credit Course:

This course covers construction lien law, dispute resolution & contracts, building codes, and risk management and liability to satisfy the recent 4-credit requirement on these topics.

Adapting to Market Trends: A How-To For Housing Trades:

Taught by the Home Improvement Research Institute, this course covers trend topics that impact the industry such as interest rates, psychological factors that influences consumer behavior and sentiment, project activity, mortgage rates, and challenges for the building industry.

Legal Pitfalls in the Building Industry:

Taught by Robert Procter of Axley Attorneys, Robert goes over in-depth some of the most common and trouble legal occurrences in the building industry, such as: how to avoid litigation, problems with contracts and how to mitigate them, how builders can and should protect themselves, warranties, construction standards, and more.

Universal Design:

This course covers a range of topics on how to build homes for people with diverse abilities. Topics such as contrasting colors, mechanisms with low physical effort and other key mobility features, along with the Fair Housing Act is covered.
